<b>Overview</b>	<b>xiii</b>
<b>Chapter 1: The global context</b>	<b>1</b>
Trade and investment flows	2
Impact on labour markets and labour standards	3
International policy issues	6
New challenges for national policies	9
<b>Chapter 2: Is full employment <i>passé</i>?</b>	<b>13</b>
Introduction	13
The end of work?	15
Delinking income from work?	23
A revolution in the nature of work?	24
Changed attitudes towards work and unemployment?	37
Rising voluntariness of unemployment?	38
Updating the concept of full employment	39
<b>Chapter 3: Industrialized countries:</b>	
<b>Reversing the drift from full employment</b>	<b>47</b>
Main stylized facts of labour-market developments	47
High and persistent unemployment	47
Labour-market rigidities	49
Macroeconomic factors	55
Rising wage inequality	58
Trends in wage inequality and low-paid employment	59
Patterns of change across countries	59
Growing low-pay employment and its consequences	61
Explanations of rising wage inequality	69
Is growing international trade to blame?	69
Is technological change responsible?	73
Do institutional changes matter?	75
The role of the macroeconomic environment	75
Policies for reapproaching full employment	77
Aiming at higher growth	78
Is potential growth limited to 2 to 2.5 per cent?	79
Can expansionary policies raise growth?	87
Mechanisms for moderating wage inflation	90
Coordination of wage bargaining	91
Other possible mechanisms	92

Labour market policies	93
Reforming the unemployment benefit system	94
Direct job creation	98
Policies promoting training	100
<b>Chapter 4: Containing high unemployment in transition economies</b>	<b>107</b>
Transition and full employment	107
The emergence of high unemployment	109
The transition process	117
Progress made	117
Remaining challenges	121
Policy issues	123
Macroeconomic policies	123
Labour institutions for a market economy	125
Promoting enterprise growth	129
Transitional employment subsidies	130
<b>Chapter 5: Economic reform and employment in developing countries</b>	<b>139</b>
Introduction	139
The objective of full employment in developing countries	140
Employment performance	142
Overall employment growth and unemployment	142
Employment in manufacturing	146
Employment elasticity	151
Change in the structure of employment	155
Growth and adjustment	157
Growth performance	163
Degree of openness	169
Savings and investment	171
Preconditions for higher growth	173
Economic reform and employment	174
Strategic issues	175
Role of the State	175
Pace and sequencing of reforms	176
Trade liberalization	178
Ensuring equity in reform programmes	179
Vulnerable groups	179
Reducing rural poverty	180
Promoting small and medium-sized enterprises	181
Labour-market regulation and employment	182
Are minimum wages set too high?	183
Are non-wage labour costs too high?	185
Do macroeconomic data suggest overall employment and wage rigidities?	188
Changes in wage inequality	189
Economic liberalization and wage inequality	189
Trends in wage dispersion in manufacturing	193
Correlates of changes in wage dispersion	195

Real wages	195
Labour productivity	195
Employment	197
Output	198

**Conclusions on employment policies in a global context adopted by the  
83rd Session of the International Labour Conference, June 1996** 201

**Tables**

1.1	Growth of world trade (goods and services), 1974–95	2
1.2	Growth of real GDP, 1966–95	3
1.3	Foreign direct investment inflows, 1981–94	3
1.4	Growth of real per capita GDP, 1981–95	7
2.1	Employment, working-age population and per capita employment	18
2.2	Labour-force growth and trend in participation rates	19
2.3	GDP and employment growth	20
2.4	Long-term relationship between employment and GDP growth	22
2.5	Employment content of the last two recoveries in selected OECD countries	23
2.6	Non-standard forms of employment	26
2.7	Employment by occupation	27
2.8	Average job tenure over the business cycle	31
2.9	Distribution of accumulated and eventual tenure	32
2.10	Employees' commitment to work in the United Kingdom, 1984–93	38
3.1	Unemployment rate by educational level	53
3.2	Indicators of nominal rigidities in wages and prices	56
3.3	Impact on GDP of a reduction in public expenditure according to various multinational macroeconomic models	57
3.4	Actual unemployment rate, NAIRU and contributions to the variations in NAIRU	58
3.5	Changes in family income distribution	68
3.6	Share and distribution of low-, middle-, and high-wage employment by industry, United States	70
3.7	Structure of OECD trade	72
3.8	Impact of technology on gross and intra-group wage inequality, United States	74
3.9	Potential growth and effective growth	78
3.10	Productivity trend in the enterprise sector	80
3.11	Trend in private investment rate as a percentage of the GDP	81
3.12	Orientation of economic policies over the business cycle	88
4.1	Employment structure, selected transition economies and other European countries	109

4.2	Features of unemployment, selected transition economies, 1995	113
4.3	Wages in transition economies, 1989–95	114
4.4	General economic indicators in transition economies, 1989–85	118
4.5	Industrial competitiveness and distribution of employment, selected transition economies, 1992	121
4.6	Inflows of foreign direct investment in transition economies	122
4.7	Real interest rates and capital accounts, selected transition economies, 1991–95	124
4.8	Unemployment benefits in transition economies	126
4.9	Primary taxes, selected transition economies, 1991–93	130
4.10	Comparison of average wage and GDP per employee in manufacturing/industry with average unemployment benefit, 1992–93	133
4.11	Government expenditure on subsidies, tax arrears of enterprises, unemployment compensation, and spending on employment programmes, selected transition economies, 1993	135
5.1	Labour force and employment growth, and unemployment rates	144
5.2	Share of wages in value added	152
5.3	Employment elasticity in manufacturing	153
5.4	Employment share by sector	155
5.5	Share of informal sector in non-agricultural employment, Latin America	156
5.6	Macroeconomic indicators	158
5.7	Labour market regulations	184
5.8	Social security and non-wage labour costs	186
5.9	Wage dispersion and explanatory factors, 1975–79 to 1987–91	194

### Figures

2.1	Total amount of weekly hours of work	16
2.2	Average job tenure and annual employment growth	28
2.3	Employment separations and employment growth	36
3.1	Actual unemployment rate in 1960–96 compared to 1960–73 average unemployment rate	48
3.2	Actual evolution and 1960–73 trend in real wages	50
3.3	Actual unemployment rates and NAIRUs	51
3.4	Relative unemployment rates by educational level	54
3.5	Trends in earnings dispersion	60
3.6	Trends in male real earnings of the bottom, middle and top deciles	62
3.7	Changes in unemployment and wage ratio	64
3.8	Distribution of employment by wage level	66
3.9	Capital intensity and relative cost of labour/capital in the business sector	84
4.1	Wage dispersion, selected transition economies, 1990–95	110
4.2	Unemployment rates, selected transition economies, 1990–95	111

---

4.3	Labour productivity and employment rate in transition economies, 1990–94	112
4.4	Changes in the distribution of total income in transition economies, 1987/8/9–1993/4/5	116
5.1	Manufacturing employment, value added, real earnings and productivity	148
5.2	Growth of per capita GDP	170
5.3	Growth of merchandise exports, Latin America and sub-Saharan Africa	171
5.4	Gross domestic investment as a percentage of GDP, Latin America and sub-Saharan Africa	172
5.5	Wages and unemployment	190
5.6	Correlation of wage dispersion with wage levels and productivity	196
