Part I: Description of gender equality and occupational segregation in Nordic labour markets	1
<hr/>	
1. Introduction	3
2. Background and contents of the book	5
2.1 Impact of occupational segregation on women and the labour market	5
2.2 Description of contents	6
3. The Nordic labour markets	8
3.1 The "Nordic model"	8
3.2 Comparisons on women's status	11
4. Nordic policies to enhance gender equality	29
4.1 Legal framework and national machinery	30
4.2 Family support	31
<i>Summary of Part I</i>	35
Part II: Statistical analysis of occupational segregation by sex in Nordic labour markets	37
<hr/>	
5. Description of data and comparability	39
6. Patterns in Nordic labour markets in 1990	41
6.1 Women's share of the labour market	41
6.2 Indices of inequality	41
6.3 Gender-dominated occupations	46
6.4 Largest "female" occupations	53
6.5 Seventeen typical "female" and "male" occupations	55
6.6 Effect of occupational structure on segregation in 1990	58
7. Monetization of household work and provision of public services	61
8. Women and men in higher and lower status occupations	75
Part III: Conclusion	93
<hr/>	
9. Summary and comments	95
9.1 Background	95

9.2 Main findings	95
9.3 Concluding remarks	98
Appendix: Statistics used to measure occupational segregation	101
Bibliography	104
About the authors	108
Figures	
1 Women's percentage share of non-agricultural labour force in Finland, Norway and Sweden, 1970-90	12
2 Percentage of female and male employees in the public sector in Finland, Norway and Sweden, 1992	14
3 Ratio of female to male unemployment rates in Nordic and other OECD countries, 1992-94	16
4 Female to male average hourly earnings (percentage of male earnings) for manual workers in the manufacturing industry in Nordic and other OECD countries, 1991-93	17
5 Female to male average hourly earnings (percentage of male earnings) in the manufacturing industry in all Nordic countries, 1970-92	18
6 Percentage of women workers in part-time employment in Nordic and other OECD countries, 1993	22
7 Changes in occupational segregation by sex, as measured by ID, in Nordic and other OECD countries, 1970-90	43
8 Changes in occupational segregation by sex, as measured by IDHALF, in Finland, Norway and Sweden, 1970-90	44
9 Change in ID attributable to change in sex composition of occupations and size distribution of occupations, in Nordic and other OECD countries, 1970-80	45
10 Change in ID attributable to change in sex composition of occupations and size distribution of occupations, in Nordic and other OECD countries, 1980-90	46
11 Percentage of women workers in female-dominated occupations in Finland, Norway and Sweden, 1990	49
12 Percentage point change in percentage of women workers in female-dominated occupations, based on 80 per cent definition, in Nordic and other OECD countries, 1970s and 1980s	49
13 Percentage of male workers in male-dominated occupations in Finland, Norway and Sweden, 1990	52
14 Percentage point change in percentage of male workers in male-dominated occupations, based on 80 per cent definition, in Nordic and other OECD countries, 1970s and 1980s	52
15 Size of monetized household-type occupations in Nordic and other OECD countries, 1990	66
16 Change in ID after excluding monetized household-type occupations, in Finland, Norway and Sweden, 1990	70
17 Percentage point change in male-dominated non-agricultural labour force after excluding monetized household-type occupations, in Finland, Norway and Sweden, 1990	71
