PREFACE	(i)
REPORT OF COURSE	1
General Objectives	3
Specific Objectives	4
Structure of Programme	4
Contributors to Course	6
Course Evaluation	7
Conclusions and Recommendations	7
SELECTED TECHNICAL PAPERS	9
Labour Inspection – A Review	11
Definition, Scope and Functions of Industrial Hygiene	32
Industrial Hygiene – Benefits	34
Toxicology	35
Toxicity	39
Routes of Entry	39
Threshold Limit Values	40
Work Air Standards	40
Toxicity Ratings	41
Hazard Evaluation and “The Locus of Action”	42
Hazard Control	43
The British Approach to Control of Workplace Hazards	46
O.S.H.A. Inspection Priorities	46
Occupational Health Legislation in the United States	47
Occupational Health Legislation	48
Basic Principles of Major Accident Prevention	49
Factors of Major Accident Prevention	54
	(iii)

CONTENTS (continued)

	<i>Page</i>
A Major Hazard Installation	57
Major Hazard Control System in India	59
Sampling Strategies and Techniques for Contaminant Evaluation ...	60
Physiology	64
Heat Stress	70
Heat Stress and Heat Strain	74
Incentives for a Heat Stress Control Programme	74
Thermal Comfort	75
Cooling Mechanisms of the Body	75
Heat Stress and Strain: Data Sheet	76
Heat Stress: Engineering and Work Practices	78
Respiratory Protection Equipment	79
Definitions for Particulates	80
Respiratory Protective Devices	80
Types of Respirators	81
Outline for Selecting Respiratory Protective Devices	82
Respiratory Protective Factors in Selection	83
Limitations of Indication of Smell	84
Respiratory Protection: OSHA Minimally Acceptable Programme ..	85
Steps for an Effective Respiratory Protection Programme	86
Storage and Protection	87
Respirator Fit Testing	87
Respiratory Protection	88
Instructions to Workforce	88
Changing the Process	89
Maintenance Considerations	89
Some Design Factors	90
Use of Respirators	90
Industrial Hygiene Audits	91
Audit Elements	100
Typical Audit Topics	101
