

TABLE OF CONTENTS

Foreword	(i)
----------------	-----

Chapter 1: Introduction

What are labour statistics?	1
What are administrative data?	2
Administrative data as part of an integrated system of labour statistics	2
Purpose of administrative systems	3
Differences between estimates based on administrative records and those from other sources	4
Examples of integrating statistical systems	6
Uses of labour statistics based on administrative records	7
Issues to consider in compilation and presentation of labour statistics based on administrative records	9
<i>Topics for discussion</i>	10

Chapter 2: Types of administrative systems from which labour statistics may be compiled

Personal income tax system	11
Labour inspection system	12
Alien work permit system	14
Employment exchange system and unemployment compensation	15
Registration of employers' and workers' organizations	17
Notification of industrial disputes	17
Social security scheme and employee provident fund	18
Workers' compensation scheme	19
Other reporting systems of occupational accidents and injuries	20
Government sector personnel records	20
Other systems	21
<i>Topic for discussion</i>	21

Chapter 3: Review of strengths and weaknesses of administrative records as a source of statistics

Advantages of administrative records as a source of statistics	22
Disadvantages of administrative records as a source of statistics	23
Implications for deriving statistics from administrative records	28
<i>Topics for discussion</i>	29

Chapter 4: Initial steps in compiling labour statistics

Setting priorities for statistical development of an administrative system	30
Planning/revising statistical compilations from an administrative system	31
User needs and whether they can be met by the existing system	31
Parameters of the existing system	32
Stability of the existing system	32
Administrative revisions and the likelihood of new or improved data	32
Points in the system from which data should be extracted	33
Data items to be used in statistical compilation	34
Using the system in a new way	36
Overcoming coverage limitations of the existing system	37
Layout and design of reporting tools	37
Compilation at district and provincial levels	38
Consultation between statisticians, computer analysts and administrators ..	39
Planning and managing implementation of statistical compilation	39
The issue of computerization	39
Computerized systems	40
Creating a computerized subsystem from a manual administrative system ..	40
What data should be computerized?	42
Manual systems	45
<i>Topics for discussion</i>	45

Chapter 5: Basics of data processing (pre-output)

Introduction	47
Coding of data items	47
Self-coded responses	48
Office-coded responses	48
How to code textual responses	49
Level of coding	49
Coding of vague responses and missing data	50
Quality of coding	50
Check coding	50
Computer-assisted coding	50
Use of standard classifications	51
Data editing and amendment	52
Types of errors to look for	54
“Fatal” and “query” edits	54
Errors in source documents or within the statistical system	54
Computer-based data processing systems	55
Archival of records	56
Database security	57
<i>Topics for discussion</i>	57

Chapter 6: Statistical outputs

Introduction	58
Statistical outputs	58
How are tables produced?	59
Manual tabulation	59
Computerized tabulation	61
Characteristics of table preparation and design	61
Time-series tables	64
Design of local-level reporting tables	65
Frequency of table production	65
Output evaluation/editing	66
Production of graphs and diagrams	66
Summary measures used in analysis	67
Report preparation	69
Publications and other data dissemination	69
How are the results to be used?	70
<i>Topics for discussion</i>	70
References	72
Annexes:	
Japanese employment service example	
1: Job Application Card for females, Japan	75
2: Translation of Job Application Card, Japan	76
3: Data flow for Overall Employment Information System	77
"Asialand" alien work permit example	
4: Application for work permit	78
5: Coding classifications	82
6: Edit specifications	86
7: Tabulation and publication plans	87
Other	
8: Selection of different types of graphs	89
Index	97

Boxes:

“Asialand” alien work permits:

1:	Uses of work permit statistics	9
2:	Limitations on scope and coverage	26
3:	Stages in the administrative process	35
4:	Content of computer records	43
5:	Items coded	48
6:	Computer data entry, edit detection and amendment	56
7:	Outputs	63

Figures:

1:	Example of manual tallying	59
2:	Example of using a register or ledger to manually produce a table, cross-classified by group and whether A/B/C/D/E	60
3:	Illustration of compilation of time series table on fatal accidents, by cause of accident	64
4:	Example of pictorial presentation	67
5:	Example of a break in Y-axis	68
